Department of Planning and Development
D. M. Sugimura, Director

**CITY OF SEATTLE
ANALYSIS AND DECISION OF THE DIRECTOR OF
THE DEPARTMENT OF PLANNING AND DEVELOPMENT**

Application Number: 2303104
Applicant Name: Ted Mclean for Cingular Wireless
Address of Proposal: 2760 Northwest 85th Street

SUMMARY OF PROPOSED ACTION

Master Use Permit to establish use for future construction of a minor communication utility (Cingular Wireless). Project includes the installation of a three sector antenna array (one antenna per sector) on the roof of an existing apartment building and the installation of equipment cabinets to be located in a basement garage storage room.

The following approval is required:

SEPA - Environmental Determination (Chapter 25.05, Seattle Municipal Code).

SEPA DETERMINATION: ☐ Exempt ☒ DNS ☐ MDNS ☐ EIS

☐ DNS with conditions

☐ DNS involving non-exempt grading or demolition or
involving another agency with jurisdiction.

BACKGROUND INFORMATION

Site and Vicinity Description

The proposal site is situated on the northwest corner of the intersection of 28th Avenue Northwest and Northwest 85th Street. The property contains a total area of approximately 13,769 square feet. The parcel is zoned Neighborhood Commercial 1 with a thirty foot height limit (NC1-30'). This rectangular lot contains one, three-story apartment building with a daylight basement garage.

Adjacent zoning surrounding the site is as follows:

North	Single Family Residential (SF 7200)
East	Neighborhood Commercial 1 (NC1-30')
South	Neighborhood Commercial 1 (NC1-30')
West	Neighborhood Commercial 1 (NC1-30')

Adjacent uses are as follows:

North	Residential
East	Residential
South	Residential and General Commercial (/Retail/Apartments)
West	Residential

Proposal Description

Cingular Wireless proposes to install a three sector antenna array with one antenna per sector (3 antennas total) on the rooftop of an existing 28-unit apartment building. The applicant proposes to place fiberglass enclosures around the 6' antennas which would be transparent to radio waves. These enclosures will be painted to match the building; constructed to resemble circular chimneys on the roof; and will appear to have a likeness of structural elements of the building. The fiberglass shroud and the antennas will project 11.5' above the ridge of the existing rooftop. The associated electronic equipment cabinets are to be located in a storage room in the parking garage of the same structure.

Public Comments

The public comment period for this project ended June 16, 2003. DPD received four written comments regarding this proposal. The neighbors expressed concerns regarding possible health impacts due to exposure to electromagnetic radiation emissions, the manner in which this application was noticed, the "appropriateness" of this particular location and a perceived decrease in property values.

ANALYSIS - SEPA

The initial disclosure of the potential impacts from this project was made in the environmental checklist dated May 28, 2003. The information in the checklist, applicant's statement of Federal Communication Commission Compliance, supplemental information and the experience of the lead agency with the review of similar projects form the basis for this analysis and decision.

Many environmental concerns have been addressed in the City's codes and regulations. The SEPA Overview Policy (SMC 25.05.665) discusses the relationship between the City's code/policies and environmental review. The Overview Policy states, in part, "*Where City regulations have been adopted to address an environmental impact, it shall be presumed that such regulation are adequate to achieve sufficient mitigation*" subject to some limitations. It may be appropriate to deny or mitigate a project based on adverse environmental impacts in

certain circumstances as discussed in SMC 25.05.665 D1-7. In consideration of these policies, a more detailed discussion of some of the potential impacts is appropriate.

Short - Term Impacts

The following temporary or construction-related impacts are expected; decreased air quality due to suspended particulate from building activities and hydrocarbon emissions from construction vehicles and equipment; increased traffic and demand for parking from construction equipment and personnel; increased noise; consumption of renewable and non-renewable resources. These impacts are expected to be very minor in scope and of very short duration considering the installation process. No conditioning pursuant to SEPA is warranted.

Construction and Noise Impacts

Codes and development regulations applicable to this proposal will provide sufficient mitigation for most impacts. The initial installation of the antennas and construction of the equipment room may include loud equipment and activities. This construction activity may have an adverse impact on nearby residences. Due to the close proximity of nearby residences, the Department finds that the limitations of the Noise Ordinance are inadequate to appropriately mitigate the adverse noise impacts associated with the proposal. The SEPA Construction Impact policies, (SMC 25.05.675.B) allow the Director to limit the hours of construction to mitigate adverse noise and other construction-related impacts. Therefore, the proposal is conditioned to limit construction activity to non-holiday weekday hours between 7:30 a.m. and 6:00 p.m.

Long - Term Impacts

Long-term or use-related impacts are also anticipated as a result of approval of this proposal, namely increases in demand for energy and increased generation of electromagnetic radiation emission. These long-term impacts are not considered significant or of sufficient adversity to warrant mitigation. However, due to the widespread public concerns expressed about electromagnetic radiation, this impact is further discussed below.

The Federal Communications Commission (FCC) has been given exclusive jurisdiction to regulate wireless facilities based on the effects of electromagnetic radiation emissions. The FCC, the City and County have adopted standards addressing maximum permissible exposure (MPE) limits for these facilities to ensure the health and safety of the general public. The Seattle-King County Department of Public Health has reviewed hundreds of these sites and found that the exposures fall well below all the maximum permissible exposure (MPE) limits. The Department of Public Health does not believe these utilities to be a threat to public health.

The City is not aware of interference complaints from the operation of other installations from persons operating electronic equipment, including sensitive medical devices (e.g. - pacemakers). The Land Use Code (SMC 23.57.012C2) requires that warning signs be posted at every point of

access to the antennas noting the presence of electromagnetic radiation. In the event that any interference was to result from this proposal in nearby homes and businesses or in clinical medical applications, the FCC has authority to require the facility to cease operation until the issue is resolved.

The information discussed above, review of literature regarding these facilities, and the experience of the Departments' of Planning and Development and Public Health with the review of similar projects form the basis for this analysis and decision. The Department concludes that no mitigation for electromagnetic radiation emission impacts pursuant to SEPA policies is warranted.

Other long term impacts such as height, bulk and scale, traffic, and air quality are minor and adequately mitigated by the City's existing codes and ordinances. Provided that the proposal is constructed according to approved plans, no further mitigation pursuant to SEPA is warranted.

DECISION - SEPA

This decision was made after review by the responsible official on behalf of the lead agency of a completed environmental checklist and other information on file with the responsible department. This constitutes the Threshold Determination and form. The intent of this declaration is to satisfy the requirement of the State Environmental Policy Act (RCW 43.21.C), including the requirement to inform the public of agency decisions pursuant to SEPA.

- [X] Determination of Non-Significance. This proposal has been determined to not have a significant adverse impact upon the environment. An EIS is not required under RCW 43.21C.030(2)(C).
- [] Determination of Significance. This proposal has or may have a significant adverse impact upon the environment. An EIS is required under RCW 43.21C.030(2)(C).

CONDITIONS - SEPA

During Construction

The following condition to be enforced during construction shall be posted at the site in a location on the property line that is visible and accessible to the public and to construction personnel from the street right-of-way. If more than one street abuts the site, conditions shall be posted at each street. The conditions will be affixed to placards prepared by DPD. The placards will be issued along with the building permit set of plans. The placards shall be laminated with clear plastic or other waterproofing material and shall remain posted on-site for the duration of the construction.

1. In order to further mitigate the noise impacts during construction, the hours of construction activity shall be limited to non-holiday weekdays between the hours of 7:30

a.m. and 6:00 p.m. This condition may be modified by DPD to allow work of an emergency nature or allow low noise interior work. This condition may also be modified to permit low noise exterior work after approval from the Land Use Planner.
